

Dear (Name of Organization),

I would like to offer for free, a short educational presentation to your Moms group about a topic that is not well known: genetically modified organisms (GMOs). This presentation will explore what GMOs are, the research into the health risks associated with them and education about which foods to avoid.

***“Genetically engineered foods contain new proteins that children have not been previously exposed to. I believe this may be responsible in part for the profound increase in allergies and immune dysfunction that I am witnessing.” —Michelle Perro, M.D. Pediatrics***

All Moms want what’s best for their families, especially to know that the foods they buy are healthy and safe. With the increase in the past two decades of autism up 1500%, ADHD 400%, asthma 300% (with asthma deaths increasing by 56%) and allergies 400%- we must educate ourselves with the knowledge of how to keep our children and families healthy.

Here is a video that will tell you more about GMOs:  
<http://www.youtube.com/watch?v=fWXrRftyOMY>

I believe this is information that parents will want to know so that they can make truly healthy choices for their families. Please don’t hesitate to contact me with any questions. You can reach me at (phone #).

I look forward to hearing from you very soon.

In Health and Wellness,  
(Name, title)
